SAFETY

INTEGRATING SAFETY & SUSTAINABILITY

Safety at McCarthy Building Companies, Inc. (McCarthy) is everyone's responsibility and contributes to our company's sustainability efforts.

Taking pride in safety contributes to a healthier workforce, resource efficiency, and the building of trust between our project teams and the communities where we live and work. The synergy between safety and sustainability reflects our integrated approach and aligns with our core values.

BUILDING A SAFER & MORE SUSTAINABLE FUTURE

The relationship between construction safety and sustainability is central to our mission to be the best builder in America. Our culture of safety is a fundamental aspect of sustainability, promoting a healthy, secure workforce and positively impacting communities.

Our commitment to safety protects everyone on our job sites and reduces costs and downtime from workplace injuries, supporting McCarthy's long-term viability.

Sustainable practices like efficiency and waste reduction further benefit our client's financial performance and enhance resilience.

Continuous improvement drives both safety and sustainability at McCarthy.

By proactively identifying and addressing safety hazards, we foster safer work environments and encourage innovation in sustainable practices.

Together, these efforts improve project performance, contributing to a safer and more accountable project environment across all our work.

80% SAFER THAN INDUSTRY AVERAGE*

*McCARTHY'S 2024 TOTAL PROJECT RECORDABLE INCIDENT RATE (TPRIR) EXCEEDS INDUSTRY AVERAGE BY 80%
